

PIR SONIC BIRDCHASER[®]

The Most Natural, Effective,
Environmentally Friendly Way of Deterring Pest Birds!

The SONIC BIRDCHASER uses a natural predatory principle to scare unwanted birds away from your farm, orchard, garden, yard or any other properties. The built-in PIR sensor detects movement and the powerful loudspeaker broadcasts predatory calls of the hawk, falcon, eagle and owl species. Moreover, the user may choose to use the AUTO function where a 5 - 30 minutes time interval may be set for the SONIC BIRDCHASER to operate automatically. Finally, the SONIC BIRDCHASER has a sensor that allow it to operate only in the daytime, during which birds are active to conserve the power.

Applications:

BIRDCHASER is easily installed to protect
Farms, Yards, Orchards, Gardens, or any other properties.

EM 2001

Features:

- * PIR function allows smaller area protection.
- * AUTO function with a 5 - 30 minutes time interval for larger area protection.
- * Built-in photocell allows it to operate only in the daytime.
- * PIR function offers a daytime security to alert a possible intrusion.
- * Sounds of hawks, eagle, falcon, and owls may also scare rats and mice.
- * A User-set time interval to control sound emission.
- * Special Digital IC recording of actual predatory calls from hawks, falcons, eagle, and owls.
- * Built-in volume adjustment control.

Specifications:

Power Supply: Input: 100 - 120 VAC, 50/60 Hz, 220 - 240 VAC, 50/60 Hz
Output: 12 VDC

Sound: Digital recording of hawk, falcon, eagle, and owl

Protection Coverage: Up to 1 acre (when VOLUME is set at maximum)

PIR coverage area: arc angle of 130 degrees, a distance of 30 ft.

Worldwide Patented. German Utility Model No. 20010057.2
