

PIR + ULTRASONIC

ANIMAL-AWAY®

Chases Unwelcome Animals out of Your Garden and Yard!

The stronger and powerful Animal-Away can operate on 2 pcs. 9V alkaline battery. It provides a very convenient, non-location limited and effective way to deter the unwelcome animals without harming them. For the energy saving purpose, Animal-Away is combined with the sophisticated Infrared detecting system to monitor a fan shaped area of 70 degree, distance up to 12 meters approx.

Once the sensor is triggered within the protected zone, Animal-Away will project intensive sound waves of frequency range from 18KHz to 24KHz to deter the intruding animals out of the protected area. A built-in LED indicator will show the device is sending the sound waves after detected animals. A special built-in test button allows user to check the proper operation of the device. Animal-Away is also equipped with a DC power input jack for the option of adapter operation when required.

UNWELCOME ANIMALS AFFECTED: Cats, Dogs, Squirrels, Rabbits, Rodents

FEATURES

- Operated by two 9V alkaline batteries or mains adapter
- Compact design, Easy installation, Maintenance-free
- Infrared detection for energy saving
- Built-in LED indicator to confirm the detection and sound waves emission
- Built-in test button to check the proper operation
- Effective, Safe, Humane, Environmentally friendly
- Weather resistant

APPLICATION

- Terrace requires dog or cat intrusion prevention
- Near pond to protect fish
- Flower bed
- Bird bath/ bird feeder to protect birds
- Garden, lawn and yard
